

Prime Source E-System Implementation

STAGE 1 - TRAINING

With our software you don't just get a cd. When you purchase through Prime Source E-System, you will be earning a relationship with us. We believe in service That's why we include a full day of in house training for all of our clients. We also include web meetings where we do training as if we were in your office. Through out stage 1 we are available to show you how to change your operations so that your purchasing flows in a proven scientific method. We also help you align your purchasing so that it flows with our program.

STAGE 2 - DATA INTEGRATION.

Getting your data into our system is one of the hardest parts of moving on to a software or a new software. Our System comes loaded with each and every product a healthcare facility utilizes for each and every department. We will hold your hand throughout this entire stage so that data integration is as seamless as possible.

STAGE 3 IMPLEMENTATION.

We schedule a launch date together. We make sure to have our people in your office on the launch date. Our people are onsite ready to answer any of your questions or deal with any unforeseen difficulties that might arise on the implementation day.

STAGE 4 MONITORING AND CUSTOMIZATION.

Once you are up and running we monitor your data to make sure that your employees are utilizing our software to its fullest. We then analyze your data to find cost cutting methods. At this stage we are also open to any customization that you might require.
